Parts in the product

The chest rig with two plate pockets attached.

Two plate pockets attached and the side is closed.

The yoke is very cool to make it comfortable in hot weather.

The inside has 5 mm foam and the outside webbing and a plastic board.

An elastic cord is running along the edge for cable management.

The lower part of the front forms a pocket for the plate pocket.

Push the Velcro/webbing straps through the upper or lower MOLLE band on the back of the yoke.

Push the Velcro/webbing straps under the 10 mm wide webbing and secure them on the loop Velcro patch.

Push the webbing with side release buckles into the tunnels as far down as possible. Attach the side release buckles in the back top of the front panel.
