

DUAL SIDE COVERT EQUIPMENT HARNESS -11

15-00492

Carry all the minimum mission equipment you need concealed under your jacket

When you have a break, remove the vest with all your equipment intact and relax. Put it on again and you know that you have everything you need

FEATURES

- * A very lightweight and tight harness for minimal covert equipment carry
- * On the shoulder harness you can attach your normal pouches and holsters or turn it upside down and use the integrated, elastic pouches to store your gear.
- * Stores communication gear, baton, tear gas spray, a flashlight and other items required during surveillance and security operations
- * Low profile
- * Covert carry with open and closed jacket
- * For one radio, one CS spray can, handcuffs and a telescopic baton
- * The harness is small and thin and is carried so it cannot be seen while using an open jacket or shirt
- * The harness is comfortable despite its narrow shoulder straps. The side straps and the belt straps relieve pressure from your neck. You can place all your equipment in the harness instead of in your trouser and jacket pockets. All your equipment will be stored in one place and will be easily accessible
- * The harness is easy put on and take off
- * Side strap stops the harness sliding forward
- * On the shoulder strap a microphone can be attached.

DIMENSIONS

Two panels, each 18x18 cm

WEIGHT

320 g

DUAL SIDE COVERT EQUIPMENT HARNESS -11

15-00492

The side panels can be mounted in any direction and face in or out. This is the standard set up. The wires are secured under the elastic holders on the shoulder straps.

The radio panel facing out has been rotated.

Both panels have been rotated and are facing out.

The radio panel has been rotated and facing in.

The handcuff panel has been removed to minimize the profile.

A MOLLE panel (not included) has been attached instead of the handcuff panel. On the MOLLE panel, a pistol holster has been attached (not included).

The radio panel facing in.

The radio panel facing out.

The pistol holster on the right hip is not included in the harness.
